$$L(x, y) = R(x - D_X(x, y), y - D_Y(x, y)) + N(x, y)$$

$$\mathfrak{R}_3 = \sum_{x_i \in \Omega_1, y_i \in \Omega_2} |f(x_i) - g(y_i)|$$

$$(x^\odot, y^\odot) = \arg \max_{(x^\odot, y^\odot) \in \Omega} \tilde{\mathfrak{R}}(\omega_L, \omega_R(x^\odot, y^\odot))$$
